Self-Health Products

**What's
New?**

50% Discount on a Zapper or a Silver Maker with the purchase of any SOTA unit at regular price.

WHY IS SOTA OFFERING A 50% DISCOUNT ON NEW STREAMLINED UNITS when purchased with any unit at the regular price? Recent events have made us realize it is time, for now, to discontinue manufacturing the Zapper and the Silver Maker.

Governments are, unfortunately, choosing to restrict freedom of choice in health care. Because of this, we have taken a close look to decide which units we are willing to put time, energy and money to defend as well as to research. If time, energy and money were no concern then we would not have to make this choice.

Our closer look made us realize there is a company who is putting time, energy and money to truly honor the work of the individual who created the Zapper. We also realized there is a great company putting the effort into research for the use of Colloidal Silver. At SOTA, our efforts are focused on the research and defense of the bio-stimulator function of the Silver Pulser, the Magnetic Pulser and the Bio-Tuner.

Our hearts and passion are with these technologies and the pioneering work of the man who developed them. We want to assure you, our customer, that we admire and respect all the individuals out there who are doing pioneering work in the field of electricity and health.

And so, our decision is to discontinue manufacturing the Zapper and Silver Maker at this time. For that reason we are offering them at a 50% discount when purchased with any of SOTA's units at regular price ... while quantities last.

- Streamlined models of the Silver Pulser, Magnetic Pulser, Bio-Tuner, Silver Maker and Zapper are available now.
- The Water O₃ zonator was delayed as the internal air pump was too noisy in some units. We have now solved that problem so the WOZ4 will be available late fall. Discount continues on this unit.
- Discount continues on the Harmonic Pulser while supplies last. This unit is also being discontinued.

- 1) It is a Bio-Stimulator to promote health and well-being.
- 2) It makes *electrically-charged* Ionic/Colloidal Silver.

What is the Bio-Stimulator function?

Our body systems operate electrically. There is considerable evidence that the chemical reactions that keep us functioning depend on electrical activity—the Bio-Stimulator provides microcurrents of electricity.

What is Ionic/Colloidal Silver? It is a natural anti-bacterial solution that can be used externally, internally and for household use. It costs only pennies per cup to make your own Ionic/Colloidal Silver.

- **Lights indicate when circuit is working correctly and when battery is low.**
- **Clip on back easily secures unit to arm holder**
- **Constant voltage so output does not decline as battery weakens**
- **Constant current for superior ionic/colloidal silver**
- **Option to operate using AC-DC Wall Adaptor, a 12 Volt DC automobile battery or Solar Panel for Ionic/Colloidal Silver function.**

3-year warranty on all internal components.

The Water O₃zonator

MODEL WOZ4 ~~\$350.00~~ \$275.00 US

Exclusive Tesla-based technology allows the WOZ4 to operate from a 12 Volt DC power source like an auto battery or Solar Panel.

- High reliability, low vibration, built-in Air Pump: fully ozone resistant.
- Ozonates 8 ounces of distilled water at room temperature in about 1 minute.
- Meets minimum requirements for water sterilization. See next page for water sterilization lab tests.

Ozone Output: The WOZ4 is rated at over **200 mg/hr** using the ozone-in-air method for accuracy.

The WOZ4 has more than twice the output of the WOZ3.

An independent lab tested the WOZ3 model and reported that zero Oxides of Nitrogen (NO_x) were released during the test.

More Unique Features:

- Super-lightweight and portable design
- Aluminum-free. Absolutely no aluminum or ceramic alumina (aluminum oxide) used in the ozone path.
- Simple operation—flip the switch for use.
- Tesla-Based High efficiency Fused Quartz Crystal, High Frequency Corona Discharge (CD) ozone generator.

SOTA's Water O₃zonator Effective in Killing Virulent Pathogens

WOZ4 outputs more than 200 mg/hour. Tests by two independent laboratories using SOTA's WOZ3 model of the Water O₃zonator—a less powerful model than the WOZ4—proved effective as follows:

Laboratory 1: 100% bacteriocidal effect after 15 minutes in one gallon (four liters) of water contaminated with three virulent pathogens. All were killed:

1. Escherichia coli (ESC) with 0.96×10^6 contamination.
2. Pseudomonas aeruginosa (PSA) with 0.91×10^6 contamination.
3. Staphylococcus aureus (SAU) with 0.80×10^6 contamination.

Laboratory 2: 100% effectiveness after 5 minutes in 250 ml of water. The following seven virulent pathogens were killed:

1. Candida spp with 38×10^6 contamination.
2. Salmonella spp (typhoid fever) with 58×10^6 contamination.
3. Shigella spp with 62×10^6 contamination.
